

Introduction

Congratulations on your purchase of the **WisDom** - RISCO Group's Wireless Security System. The WisDom has been specifically designed to meet a wide range of security needs for many residential and small commercial applications. To make the most of your system we advise you to take some time to read through this easy user guide and also the accompanying user manual.

Wireless Devices

To ease your installation, all devices have already been pre-programmed into the system. The ID of each device is marked with a sticker on the device plastic and on the package. Devices in the kit include:

3 Magnetic Contacts

- Defined as zones 1,2 and 4
- Default application:
 - Zone 1 :Front door (Exit/entry)
 - Zone 2: Back door (Instant)
 - Zone 4: Garage door (Exit/entry)

1 PIR/Pet Detector

- Defined as Zone 3
- Default application: Living room.
- Zone type: Interior + Entry Follower

2 Wireless Key Fobs

Note: The buttons on the wireless key fob are sensitive to avoid false alarms, please handle the fobs with care

Note: Remove the batteries from their plastic insulation. Replace them into the battery compartment and fit the lid.
